

HOIN JUNG

Purdue University, West Lafayette, IN, USA

jung414@purdue.edu | +1 765-532-2263 | linkedin.com/in/hoinjung

EDUCATION

Purdue University

Ph.D. in Electrical and Computer Engineering

· Expected Graduation: May 2027

West Lafayette, IN, USA

Jan. 2023 – Present

Seoul National University

M.S. in Computational Science and Technology

· Thesis: “Local-Ensemble Graph Collaborative Filtering with Spectral Co-Clustering”

Seoul, Korea

Sept. 2020 – Aug. 2022

Korea Aerospace University

B.E. in Aerospace & Mechanical Engineering

· Major of Aircraft System Engineering

Goyang, Korea

Mar. 2010 – Feb. 2014

RESEARCH INTERESTS

Trustworthy AI

- Enhancing the trustworthiness of multimodal foundation models across a range of generative and discriminative tasks. My work addresses key challenges in bias and factuality—for example, mitigating harmful stereotypes and reducing object hallucinations—to enable safer and more reliable AI.
- My research focuses on developing lightweight and efficient post-hoc methods to align model behavior, such as through targeted adjustments to a model’s internal features and output logits, which avoids the need for costly full-scale retraining.
- While my work is grounded in general-purpose vision-language models, I am also applying these alignment techniques to specialized and high-stakes domains, including remote sensing and medical AI.

WORK EXPERIENCE

Heterogeneous Integration Design Institute

Research Assistant, Elmore ECE Emerging Frontiers Center

- Designed an automatic generative designer for multi-band planar antenna.
- Engineered an explainable model for the ML-based EM simulation via SHAP values.

West Lafayette, IN, USA

Jan. 2023 – Present

Samsung Research America

Research Scientist Intern

- Collaborated with engineers as a research scientist intern on AI-driven Smart TV solutions.
- Designed an automatic keyboard navigation system powered by a vision-language model, designed for real-world deployment across Smart TV applications.

Irvine, CA, USA

May. 2025 – Aug. 2025

Samsung Electronics

Engineer, R&D Team, Department of Digital Appliance

- Developed the thermo-fluid performance of freezing system for brand-new refrigerator.
- Analyzed and optimized refrigeration cycle control system to reduce the power usage.

Suwon, Korea

Aug. 2017 – Aug. 2020

ROK Air Force

Lieutenant, Aircraft Maintenance Officer, The 19th Fighter Wings

- Managed aircraft line maintenance and administered ground safety department for the military base.

Chungju, Korea

Jun. 2014 – May. 2017

AWARDS AND SCHOLARSHIP

Outstanding Reviewers (Top 5%), CVPR 2025	Jun. 2025
Purdue Graduate Student Government Travel Grant	Nov. 2024
NeurIPS 2024 Scholar Award	Oct. 2024
NeurIPS 2024 Spotlight Paper (Top 2.5%)	Oct. 2024

Future Industry Talent Graduate Scholarship,
Hyundai Motor Chung Mong-Koo Foundation
National S&T (Science & Technology) Scholarship,
Korea Student Aid Foundation

Fall 2021 – Spring 2022

Fall 2010

ACADEMIC SERVICE

Conference Reviewing & Program Committees

- Program Committee: AAAI (2025, 2026)
- Reviewer: ICLR (2026), CVPR (2025, 2026), WACV (2026), NeurIPS (2025), SafeMM-AI Workshop (ICCV 2025), ECCV (2024), AAAI (2024), KDD (2024)

Journal Reviewing

- IEEE Transactions on Geoscience and Remote Sensing

University Service

- Grant Review and Allocation Committee, Purdue Graduate Student Government

LEADERSHIP

Mentor, Purdue ECE G-LaMP (Graduate Leadership and Mentorship Program) (2025-2026)

Co-Chair, ICON Student Research Conference, Purdue University (2026)

Vice President, Students Government, Korea Aerospace University (2013)

PRESENTATIONS

1. “Adaptive Logit Adjustment for Debiasing Multimodal Language Models” Mar. 2025
Poster, Purdue ECE Open House Symposium
2. “A Unified Debiasing Approach for Vision-Language Models across Modalities and Tasks” Dec. 2024
Spotlight Poster, Neural Information Processing Systems (NeurIPS 2024)
3. “An Efficient and Unified Debiasing Approach for Vision-Language Models across Modalities and Tasks” Jul. 2024
Lightning Talk, Fast Machine Learning for Science Conference 2024
4. “Explainable Planar Multiband Antenna Designer with Wasserstein Generative Adversarial Network” Jul. 2024
Oral, 2024 IEEE International Symposium on Antennas and Propagation
5. “Boundary Improvement Module for Binary Semantic Segmentation in Remote Sensing” Jun. 2021
Oral, Korean Society for Industrial and Applied Mathematics (KSIAM)
6. “Segmentation model for tracking building in satellite imagery” Nov. 2020
Poster, Korean Society for Industrial and Applied Mathematics (KSIAM)

TEACHING EXPERIENCE

ECE 570 Artificial Intelligence

Teaching Assistant, Electrical & Computer Engineering

Purdue University, West Lafayette, IN

Fall 2024, Spring 2025

- Held office hours and led student projects across three course sections, serving a total of 545 students.

Computer Literacy & Programming (Python)

Instructor, Language Education Institute

Seoul National University, Seoul, Korea

Mar. 2021 – Jul. 2022

- Designed and delivered a Python programming course for beginner-level students for three semesters.

L0444: Basic Computing (Python)

Teaching Assistant, Faculty of Liberal Education

Seoul National University, Seoul, Korea

Spring 2021, Spring 2022

- Led weekly lab sessions for 50+ students each semester.
