EDUCATION

Purdue University <i>Ph.D. in Electrical and Computer Engineering</i> · Dissertation: Efficient Surgical Interventions for Trustworthy Multimodal Machine Learning Systems	West Lafayette, IN, USA Jan. 2023 – Expected May. 2027
Seoul National University <i>M.S. in Computational Science and Technology</i> · Thesis: Local-Ensemble Graph Collaborative Filtering with Spectral Co-Clustering	Seoul, Korea Sep. 2020 – Aug. 2022
Korea Aerospace University <i>B.E. in Aerospace & Mechanical Engineering</i> · Major of Aircraft System Engineering	Goyang, Korea Mar. 2010 – Feb. 2014

RESEARCH INTERESTS

Trustworthy & Efficient Multimodal Systems

Research Context

- Primary Domain: Trustworthy AI, Multimodal Systems, Retrieval-Augmented Generation (RAG)
- Key Problems: Factual Grounding, Fairness & Debiasing, Uncertainty Quantification (UQ), Hallucination

Research Methodology

- Core Philosophy: Efficient Post-Hoc Methods without Costly Retraining
- Key Techniques: Causal Inference, Latent Feature & Logit Adjustment, Multimodal Explainability

AWARDS AND SCHOLARSHIPS

Bilsland Dissertation Fellowship <i>Purdue University</i> • Awarded to outstanding Ph.D. candidates to support final dissertation completion.	Spring 2027
KDD 2026 Research Track Best Reviewer (370 selected)	Aug. 2026
CVPR 2026 Outstanding Reviewers (Top 5%)	Jun. 2026
Advancing Machine Learning for Scientific Discovery Fellowship <i>Los Alamos National Laboratory</i> • Awarded to select graduate researchers to develop trustworthy and transparent machine learning methodologies for critical scientific applications.	Summer 2026
Purdue University Nominee for Google PhD Fellowship (4 of 32 selected)	Apr. 2026
CVPR 2025 Outstanding Reviewers (Top 5%)	Jun. 2025
Purdue Graduate Student Government Travel Grant	Nov. 2024
NeurIPS 2024 Scholar Award	Oct. 2024
NeurIPS 2024 Spotlight Paper (Top 2.5%)	Oct. 2024
Future Industry Talent Graduate Scholarship <i>Hyundai Motor Chung Mong-Koo Foundation</i>	Fall 2021–Spring 2022
National S&T (Science & Technology) Scholarship <i>Korea Student Aid Foundation</i>	Fall 2010

WORK EXPERIENCE

Los Alamos National Lab (LANL)

Los Alamos, NM, USA

Advancing Machine Learning for Scientific Discovery Fellowship (Graduate Internship)

May 2026 - July 2026

- Developed a computational benchmark for evaluating causal-discovery methods on nonlinear, nonstationary time-series data with changing causal structures.
- Implemented and evaluated machine-learning and statistical causal-discovery baselines in Python using standardized windowing protocols and graph-recovery metrics.
- Designed experiments to analyze the effects of causal drift, observation-window length, and model assumptions on causal-graph identification performance.

Heterogeneous Integration Design Institute

West Lafayette, IN, USA

Research Assistant, Elmore ECE Emerging Frontiers Center

Jan. 2023 – Present

- Designed an automatic generative designer for multi-band planar antenna
- Engineered an explainable model for the ML-based EM simulation via SHAP values

Samsung Research America

Irvine, CA, USA

Research Scientist Intern

May. 2025 – Aug. 2025

- Conducted research on AI-driven Smart TV solutions in collaboration with senior engineers
- Developed an automatic keyboard navigation system using vision-language models (VLMs), specifically optimized for commercial deployment

Samsung Electronics

Suwon, Korea

Engineer, R&D Team, Department of Digital Appliance

Aug. 2017 – Aug. 2020

- Developed the thermo-fluid performance of freezing system for brand-new refrigerator
- Analyzed and optimized refrigeration cycle control system to reduce the power usage

ROK Air Force

Chungju, Korea

Lieutenant, Aircraft Maintenance Officer, The 19th Fighter Wings

Jun. 2014 – May. 2017

- Managed aircraft line maintenance and administered ground safety department for the military base

ACADEMIC SERVICE

Conference Reviewing & Program Committees

- Area Chair: IEEE ICASSP (2026)
- Program Committee: AAAI (2024, 2025, 2026), IEEE BigData (2025)
- Reviewer: ICLR (2026), CVPR (2025, 2026), WACV (2026), NeurIPS (2025, 2026), SafeMM-AI Workshop (ICCV 2025), ECCV (2024), KDD (2024, 2026)

Journal Reviewing

- IEEE Journal on Multiscale and Multiphysics Computational Techniques (JMMCT)
- Transactions on Machine Learning Research (TMLR)
- IEEE Transactions on Geoscience and Remote Sensing (TGRS)

University Service

- Grant Review and Allocation Committee, Purdue Graduate Student Government

TEACHING EXPERIENCE

- | | |
|--|--|
| ECE 695 Machine Learning in Bioinformatics and Healthcare
<i>Guest Lecture</i> | Purdue University, West Lafayette, IN
Fall 2025 |
| · Designed and delivered a lecture on “Post-Training and Inference-Time Approaches for ML in Healthcare,” introducing advanced efficiency techniques to graduate students. | |
| ECE 570 Artificial Intelligence
<i>Teaching Assistant, Electrical & Computer Engineering</i> | Purdue University, West Lafayette, IN
Fall 2024, Spring 2025, Spring 2026 |
| · Held office hours and led student projects across three course sections, serving a total of 804 students | |
| Computer Literacy & Programming (Python)
<i>Instructor, Language Education Institute</i> | Seoul National University, Seoul, Korea
Mar. 2021 – Jul. 2022 |
| · Designed and delivered a Python programming course for beginner-level students for three semesters | |
| I0444: Basic Computing (Python)
<i>Teaching Assistant, Faculty of Liberal Education</i> | Seoul National University, Seoul, Korea
Spring 2021, Spring 2022 |
| · Led weekly lab sessions for 50+ students each semester | |

LEADERSHIP

- Mentor**, Purdue ECE G-LaMP (Graduate Leadership and Mentorship Program) (2025-2026)
- Co-Chair**, ICON Student Research Conference, Purdue University (2026)
- Vice President**, Students Government, Korea Aerospace University (2013)

PRESENTATIONS

- | | |
|---|-----------|
| 1. “Adaptive Logit Adjustment for Debiasing Multimodal Language Models”
<i>Poster, Purdue ECE Open House Symposium</i> | Mar. 2025 |
| 2. “A Unified Debiasing Approach for Vision-Language Models across Modalities and Tasks”
<i>Spotlight Poster, Neural Information Processing Systems (NeurIPS 2024)</i> | Dec. 2024 |
| 3. “An Efficient and Unified Debiasing Approach for Vision-Language Models across Modalities and Tasks”
<i>Lightning Talk, Fast Machine Learning for Science Conference 2024</i> | Jul. 2024 |
| 4. “Explainable Planar Multiband Antenna Designer with Wasserstein Generative Adversarial Network”
<i>Oral, 2024 IEEE International Symposium on Antennas and Propagation</i> | Jul. 2024 |
| 5. “Boundary Improvement Module for Binary Semantic Segmentation in Remote Sensing”
<i>Oral, Korean Society for Industrial and Applied Mathematics (KSIAM)</i> | Jun. 2021 |
| 6. “Segmentation model for tracking building in satellite imagery”
<i>Poster, Korean Society for Industrial and Applied Mathematics (KSIAM)</i> | Nov. 2020 |
